

## ***Quick Installation Guide***

**Note :** **DO NOT** connect the GigaLAN Adapter to your Desktop/NB/UltraNB before completing the driver installation.

This Quick Installation Guide describes only the basic instructions on installation.

For more information, please refer to the User's Manual on the provided CD.

### **On windows XP/Vista/7/8**

1. Insert the provided CD into your CD-ROM, Locate and double-click the <Setup.exe> file in the Driver folder to launch the setup program.
2. Wait for the program to install the drivers.
3. Click <Finish> to complete the installation.
4. Connect the GigaLAN Adapter's USB end to a free USB port of your Desktop/NB/UltraNB. At this stage, different situations may occur according to your operation system.

### **On MAC 10.6 to 10.10**

1. Insert the provided CD and double-click "AX88179\_Macintosh\_XXXX" to launch the set up procedure.
2. Click the <Continue to install> and it will restart your computer automatically.
3. Connect the GigaLAN Adapter to a free USB Port.
4. You can click System Preferences on the desktop/NB/UltraNB to check if the installation is completed.

Generally, driver would be installed automatically on Mac 10.6/10.7, but if you can't connect the internet by using DHCP, please install the provided driver and follow the instructions as Mac 10.6/10.7 installation.

Now you can connect your network device Switch, Router, DSL/Cable Modem, to the GigaLAN adapter's LAN port via an Ethernet Cable.
