

KEENETIC

SPRINTER

AX1800 Mesh Wi-Fi 6 Gigabit Router/Extender with a 4-Port Gigabit Smart Switch

Unique Whole Home and Mesh Wi-Fi Capabilities

Wi-Fi is a core essential of the modern home. Keenetic routers deliver reliable, continuous and secure Wi-Fi throughout your home. Starting from one main Keenetic router, as your demand grows, you can add Keenetics as Wi-Fi extenders to grow from a single node system to a centrally managed multi-node Whole-Home Wi-Fi System. Wi-Fi System configuration can be optimized depending on your personal performance and usage requirements through leveraging existing Ethernet wiring to connect extenders or using wireless Mesh connections. The multi-node Keenetic Wi-Fi system will ensure seamless roaming throughout your home regardless of its structure and dimensions.

Continuous Reliable Internet

Your Keenetic gives you the freedom to use more than one ISP regardless of the connection types and service packages you have signed up for. A real stand out feature of your Keenetic is the capacity to connect easily to multiple ISPs simultaneously for failover and load balancing using Gigabit Ethernet and Wi-Fi links. If you experience a break in service from an ISP, your Keenetic router will automatically and seamlessly switch to a different working ISP so your smart home will stay smart 24/7.

Robust Cyberthreat Protection

Your Keenetic comes with security options preconfigured for safe operation in the home, right out of the box. Like no other home router Keenetic deploys bank-grade digital HTTPS certificates to secure device management sessions, offers network segmentation to isolate and guard the traffic of smart home IoT gadgets, and performs fully automatic regular software updates to maintain constant market-leading levels of security, reliability, performance.

Parental Control Tools

Keenetic has cloud-based Content Filtering and Ad Blocking options from AdGuard, CleanBrowsing, Cloudflare, NextDNS, and SafeDNS. Undesirable images or information, time-stealing games, and social media as well as aggressive round the clock marketing can all be managed and kept out of your family life. Each member of your family has an individual content filtering profile and scheduling function – only allowing Internet access when you choose. With one click, you can control your children's Internet usage.

Smart Home and IoT Ready

Keenetic Mesh Wi-Fi Routers' superb coverage, uninterrupted connections and enhanced security make them ready for tomorrow's fully-connected home and business environments. Connected devices suffer virus and other criminal attacks — Keenetic routers have advanced Network Segmentation and Cloud-based cyberthreat protection to stop the infection and prevent Spyware on any device in your Keenetic network. Using the IntelliQoS application prioritization feature, Keenetic users can prioritize, throttle or block individual applications to ensure bufferless streaming and fast, lag-free, gaming, and be confident that their work from home experience will be uninterrupted.

Friendly, Easy to Use App

By pairing your Keenetic device to the Keenetic App, you can manage your multi-node Mesh Wi-Fi System, including multiple locations, from anywhere in the world. Within minutes, you can control home networks, see connected and registered devices, and enable securely isolated Wi-Fi for your guests. Setting up weekly schedules for members of your family, monitoring their Internet activity, managing content restrictions or pausing the Internet from the palm of your hand could not be simpler.

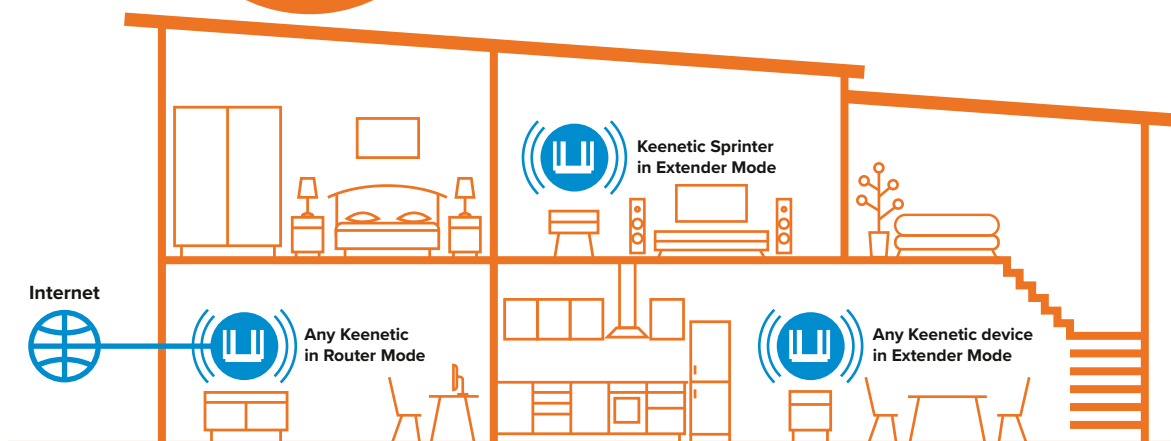

Fully Capable for Complex Business Needs

With your Keenetic, you can take advantage of affordable business-class performance, security, and reliability. Keenetics are perfect for home offices and teleworkers, smaller offices and businesses like most retailers, medical and dental offices, real estate agencies, and small hospitality providers, including bars and restaurants. Keenetic delivers easy to use genuine business-class features on a multi-node Wi-Fi System offering many advantages:

- Uninterrupted connectivity with built-in redundancy and load balancing;
- Heightened employee productivity through continuous access and comprehensive protection from hackers, viruses, and other threats;
- Secure connectivity for branch offices, road warriors, and telecommuters using Virtual Private Networking (VPN) technology;
- Protection against information leaks employing traffic and network resources segmentation;
- Improved customer engagement and sales opportunities through the ability to offer free Wi-Fi to your visitors with several built-in hotspot options;
- The built-in Keenetic remote management and monitoring option offers cloud-based multi-site remote monitoring and management for continuous control.

Unique Whole Home and Mesh Wi-Fi Capabilities

Key Features

- **Model number:**
KN-3710
- **CPU:**
EN7528DU 900 MHz, dual core
- **RAM:**
256 MB DDR3
- **Flash memory, Dual Image:**
128 MB
- **Wi-Fi:**
2,4 + 5 GHz
- **Wi-Fi class:**
AX1800
- **Antennas:**
5 dBi
- **Ethernet ports:**
4 x 1 Gbps
- **Wi-Fi/WPS button**
- **Mesh Wi-Fi system support :**
Yes, with physical selector

Performance

- **2,4 GHz Wi-Fi network speed:**
574 Mbps*
- **5 GHz network speed:**
1201 Mbps*
- **IPoE/PPPoE routing:**
Up to 1800 Mbps in duplex mode
- **L2TP/PPTP routing:**
Up to 800 Mbps

Wireless network

- Seamless roaming 802.11k/r/v
- MU-MIMO
- MU-OFDMA
- Airtime Fairness
- Beamforming
- OFDMA
- Pre-configured Wi-Fi protection
- WEP, WPA-PSK
- WPA2-PSK, WPA2-Enterprise
- WPA3-PSK, WPA3-Enterprise, OWE
- Multi-SSID and Guest Network
- Access control by MAC address
- Wi-Fi Multimedia (WMM)
- Supported frequency band: 2400-2483,5 MHz,
- Supported frequency band: 5150-5350 MHz, 5470-5725 MHz.

Features and protocols

- IPoE, PPPoE, PPTP, L2TP, 802.1x
- Multi-WAN
- Policy routing
- Internet connection backup
- Ping Check connectivity monitor
- PPPoE/PPTP/L2TP pass-through
- VLAN IEEE 802.1Q
- Routing table (DHCP/Manual)
- IntelliQoS
- DHCP (client/server)

- IPv6 Dual Stack
- NAT
- IGMP
- UDP to HTTP proxy
- UPnP
- Manual port forwarding
- SPI firewall with protection against DoS attacks
- PPTP (client/server)
- L2TP over IPsec client/server
- OpenVPN client/server
- SSTP client/server
- Ethernet-over-IP, IP-IP, GRE
- IPsec VPN (client/server)
- WireGuard
- Dynamic DNS client
- Direct or cloud access via KeenDNS
- HTTPS security for access via KeenDNS
- SafeDNS parental control
- AdGuard ad blocker
- Traffic statistics per client
- Bandwidth limit per client
- Access schedule per client or interface
- Guest hotspot with authentication (Captive Portal)

Troubleshooting and management

- Mobile app for Android and iOS
- Web Interface with the Initial Setup Wizard and HTTPS security
- Command Line (CLI) via TELNET/SSH
- An option to control from external network
- Backup and restore configuration
- Automatic OS updates
- System event logging

Physical specifications and environment requirements

- **Device dimensions excluding antenna, w x d x h**
214mm x 154mm x 33mm
- **Device weight**
400 g
- **Operating temperature**
0–40°C
- **Operating humidity**
20 – 95% non-condensing
- **Power supply voltage**
100-240V 50/60 Hz

Package contents

- Device
- Power adapter
- Ethernet cable
- Quick start guide

Warranty and updates

- **Updates**
until 01.2026
- **Warranty**
3 years

1. Status LED
2. FN LED
3. FN1, FN2 LEDs
4. Wi-Fi LED
5. Wi-Fi control button
6. Antennas
7. DC power socket
8. Network ports 1-3
9. Network port 0
10. Reset button
11. Operating mode switch

Ordering information

Model name	Part-number	Short description
Keenetic Sprinter (KN-3710)	KN-3710-01-EU	AX1800 Mesh Wi-Fi 6 Gigabit Router/Extender with a 4-Port Gigabit Smart Switch

* 1201 and 574 Mbps are maximum wireless signal rates derived from 802.11ax specifications, used when connecting to clients using four spatial streams and an 80/40 MHz channel bandwidth for transmission and reception. Actual data throughput and wireless coverage will vary and may be lowered by the features and settings of the equipment, the number of client devices in the network, obstacles to signal propagation, the presence of other wireless networks, and/or radio interference.
